

SAMUEL JUAN PRANOTO

Jakarta, Indonesia – Samueljuan0619@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Product Associate with strong technical execution across product development, QA (manual + automation), UI/UX design, and engineering collaboration. Computer Science graduate (GPA 3.91/4.00) experienced leading 6–10 engineers during a full-platform revamp at Kick Avenue, delivering clear requirement logic, detailed PRDs, scalable flows, and 100+ Playwright automated test cases. Acts as a bridge between business and engineering through deep understanding of frontend behaviors, API structures, edge cases, and system constraints. Comfortable owning product flows end-to-end—from requirement to design to QA to deployment. Previously achieved 95% customer satisfaction at KarirLab and led 250+ representatives serving 12,900 MSIB participants.

EDUCATION

MARANATHA CHRISTIAN UNIVERSITY

Bandung, Indonesia

Bachelor of Science: Computer and Information Science

2019 – 2023

- GPA: 3.91/4.00
- Relevant Coursework: Web Development (HTML, CSS, JavaScript), Digital Marketing, Database Management (SQL)

PROFESSIONAL EXPERIENCE

PT Karunia Internasional Citra Kencana (Kick Avenue)

Jakarta, Indonesia

Product Associate

Jul 2024 – Present

- Produced **15+ Product Requirement Documents** covering business logic, edge cases, user flows, and frontend-backend data requirements for full-platform revamp across product detail pages, checkout, payment, voucher, wishlist, and OTP modules
- Created **Figma wireframes and design enhancements** for missing or unclear components, ensuring consistency with existing design system and optimal user experience
- Served as **technical bridge for 6–10 engineers**, clarifying implementation logic, reviewing engineering specifications, and defining API contracts and behaviors
- Designed **reward system and performance dashboard** that drove engineer sprint completion to **90%+ of targets** through structured planning and clear accountability
- Built **100+ Playwright automation test cases** for end-to-end critical flows (product detail to checkout to payment methods, top-up scenarios)
- Executed **500+ manual test cases** across all modules, including API validation using **Postman**, and performed weekly regression testing on legacy systems
- Drove end-to-end product development for voucher system, wishlist, offer management, OTP functionality, and item listing modules from requirement to deployment

PT Akselerasi Karir Nusantara (KarirLab)

Jakarta, Indonesia

Customer Success

Feb 2023 – Jun 2024

- Achieved **95% customer satisfaction rate** through proactive engagement, on-site meetings, and relationship building with **100+ B2B university clients**
- Served as primary liaison between clients and internal teams, resolving **100+ technical and non-technical issues** by analyzing problems, troubleshooting solutions, and coordinating with engineering and product teams
- Built **automated WhatsApp broadcast system using Selenium**, reducing manual distribution effort from 4 hours to 15 minutes for **100+ university groups**
- Designed **operational dashboard** used across teams to track acquisition workflows, approval stages, and partnership agreements, improving decision-making speed and cross-team visibility
- Conducted **1-on-1 user interviews with 50+ universities** to gather product insights, synthesized findings, and delivered actionable recommendations to product and engineering teams

Kampus Merdeka - MSIB (Ministry of Education Program)

Jakarta, Indonesia

Communication and Community Technology Engagement

Dec 2021 – Jan 2023

- Led communication strategy for **65,000+ students** across 2 program batches, creating and distributing content through Instagram, YouTube, and live sessions to drive awareness and engagement
- Managed **250 student representatives** from partner companies supporting **12,900 program participants**, providing guidance on professional development, communication protocols, and issue escalation
- Produced and led **20+ multimedia content pieces** including 4-6 podcast episodes, Instagram posts, and live Q&A sessions, owning end-to-end content creation from ideation to scripting to publishing

- Served as primary liaison between students, partner companies, and program management, proactively identifying student concerns and translating feedback into actionable insights for program improvements
- Resolved student complaints and operational issues through empathetic listening and cross-functional coordination, maintaining program reputation and participant satisfaction in a fast-paced, dynamic environment

SKILLS

- **Programming** : React.js, Next.js, JavaScript, HTML, CSS, SQL
- **Tools & Platforms** : Figma, Playwright, Postman, Jira, Confluence, Git, DBeaver
- **Product Management** : PRD Writing, Requirement Analysis, User Flow Design, Feature Prioritization, Roadmapping, Acceptance Criteria
- **Agile & Collaboration** : Sprint Planning, Grooming Sessions, Daily Stand-ups, Retrospectives, Cross-Functional Leadership, Stakeholder Communication
- **QA & Testing** : Automation (Playwright), Manual Testing, API Testing (Postman), Regression Testing
- **Languages** : Indonesian (Native), English (Professional Working Proficiency)

LEADERSHIP & VOLUNTEER EXPERIENCE

Student Council - MSIB Batch 1

Aug 2021 – Feb 2022

- Emerged as communication leader among **250 student representatives** from partner companies during MSIB's inaugural batch, coordinating cross-functional sub-teams
- Built foundational community structure and communication protocols, bridging gaps between participants, companies, and program management
- Organized pioneering national-scale events including "Let's Get Connected" and monthly "Take Chiefs Out" initiatives to foster community engagement
- Performance as volunteer community leader led to official hiring as **Communication and Community Technology Engagement staff** for subsequent batches
